AOI's for J4TM

Revision Date:

Version 2.0 on June 23, 2017
Version 3.0 on Jan, 2018

Revision History

Name	Description
MMAFR Fault Reset	2.0 3.0 No change
MMAG Gearing	2.0 3.0 No change
MMAH Home	2.0 3.0 input data of speed command change to real data type with engineering unit capability
MMAJ Jog	2.0 3.0 Input data of speed, acceleration, deceleration command change to real data type with engineering unit capability
MMAM Move	2.0 3.0 Input data of position, speed, acceleration, deceleration command change to real data type with engineering unit capability
MMAPT Move w/ Point Table	2.0 3.0 Remove
MMAPTEdit Point Table Edit	2.0 3.0 Remove
MMAR Arm Registration	2.0 3.0 The Touch probe capture value display in engineering unit.
MMAS Stop	2.0 3.0 No change
MMASD Shutdown	2.0 3.0 No change
MMASR Shutdown Reset	2.0 3.0 No change
MMAT Torque Move	2.0 3.0 Input of torque and speed limit value change to real data type and speed limit value can be set engineering unit.
MMAW Arm Watch	2.0 3.0 Input data of position command change to real data type with engineering unit capability
MMCFG Config	2.0 3.0 1) Rename the gear ratio setting input and change the data type real 2) Adding input variable unit setting, motor rated speed
MMDR Disarm Registration	2.0 3.0 No change
MMDW Disarm watch	2.0 3.0 No change

MMRE Read Error	2.0 3.0 No change
MMReadP Read Parameters	2.0 3.0 No change
MMSF Servo Off	2.0 3.0 No change
MMSO Servo On	2.0 3.0 No change
MMWriteE Write Parameters to EEPROM	2.0 3.0 No change
MMWriteR Write Parameters to RAM	2.0 3.0 No change
