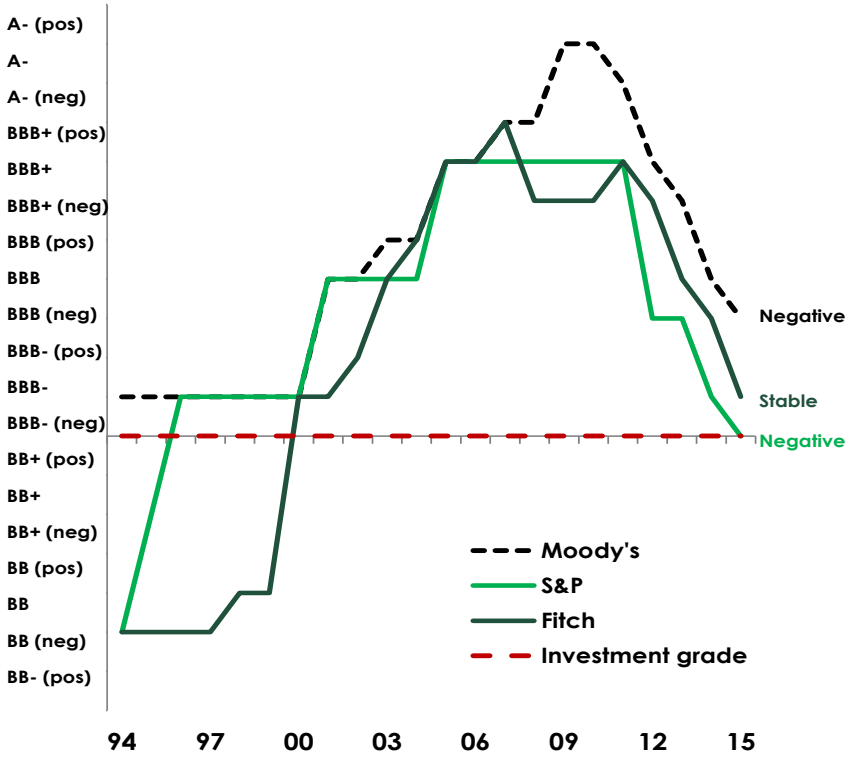
IMPLICATIONS OF A POTENTIAL SA DOWNGRADE



Market implications

- GDP declines
- Rand weakens with foreign selling, higher inflation
- Interest rate hikes and increase in taxes
- Exports improve, but weak demand
- Bond, CDS yields & foreign funding costs increase
- Property prices and JSE contract

Business implications

- Consumer pressures - lower new business, higher policy surrenders, withdrawal of savings
- Action plans in place to mitigate e.g.
  - Nedbank: Re-pricing of funding; hedging interest rate movements
  - OMEM: Hedging; focus on quality and intensifying persistency actions, customer communication, cutting expenses, re-pricing
- Remittances to Plc will reflect lower earnings
- Plc Dividend will flex based on capital management policy

*The downside risk is **manageable** and we are **well prepared**; Stress testing has shown that **capital remains resilient** and **MS can still be executed***

H1 OVERVIEW: OPERATIONAL PERFORMANCE

Top-line momentum

- Gross sales £16.0bn, up 10%[1]; NCCF[2] £3.5bn (H1 2015: £4.2bn); FUM[2] up 4%[1] to £342.7bn

Profit impacted by difficult macro and specific business-related items

- AOP[3] £708m, down 9%[1]
- IFRS profit pre-tax £608m (H1 2015: £683m)

AOP EPS 8.0 pence, down 11%[1]; IFRS EPS 5.7 pence (H1 2015: 5.4 pence)

2016 first interim dividend 2.67 pence per share, defined by capital management policy

1. Changes in constant currency.
2. Core business only and excluding Rogge. FUM comparator is 31st December 2015.
3. AOP, pre-tax and NCI, based on core business only.

OLDMUTUAL

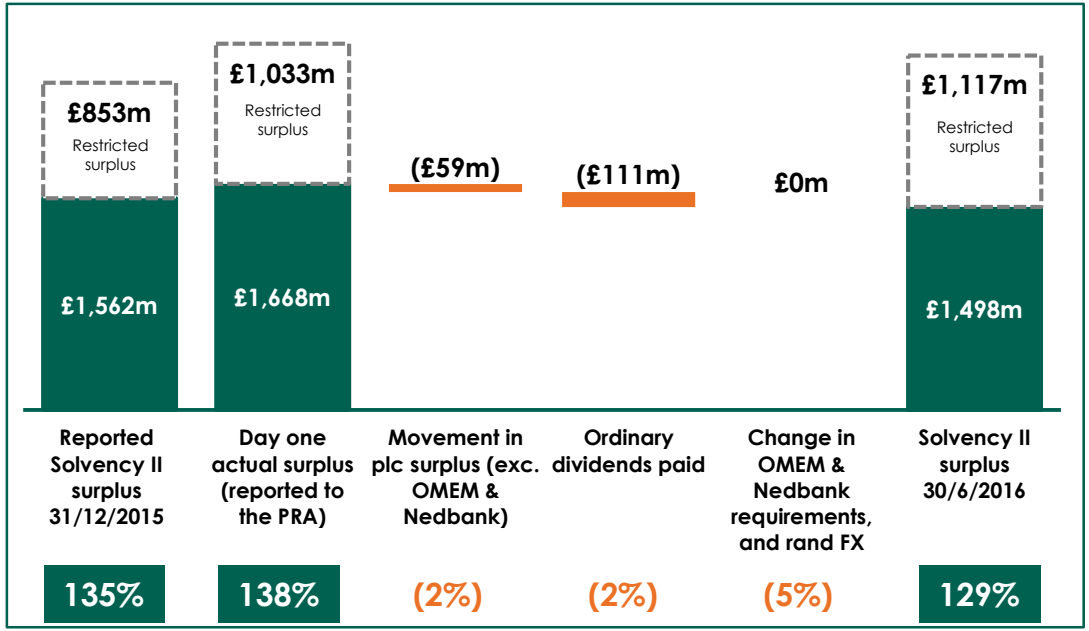
SOLVENCY II



Restricted surplus is principally the loss-absorbing surplus from South Africa which we are not allowed to recognise due to strict Solvency II fungibility and transferability restrictions.

plc Solvency II ratio is **resilient** to market and non-market stress events but is sensitive to rand movements.

Impact of **Landmark** acquisition:
- (3 ppts)

Impact of sale of Old Mutual Wealth Italy:
- 2 ppts on completion

OLDMUTUAL

RESILIENCE OF SOLVENCY II RATIO

£bn	Capital Requirements	Surplus	Coverage ratio	Restricted surplus
Base	5.1	1.5	129%	1.1
Equity markets: 25% fall	4.8	1.4	130%	0.9
Lapses[1]**:** Immediate 10% lapse	4.9	1.5	130%	1.0
Interest rates: 100 bps rise	5.1	1.5	129%	1.1
Credit spreads: 100 bps widening	5.1	1.5	129%	1.1
Currency[2]: ZAR 30% depreciation	4.2	1.5	136%	0.9
Currency[2]: ZAR 10% appreciation	5.5	1.5	127%	1.2

plc Solvency II ratio is resilient to market and non-market stress events.

Additional severe scenario testing undertaken for an SA downgrade and deteriorating economic outlook for the rest of the world also concluded that capital remains resilient.

1. Business lapse sensitivity for Old Mutual Emerging Markets and Old Mutual Wealth only.
2. Coverage ratio increases when ZAR depreciates due to a reduced weighting towards Old Mutual Emerging Markets and Nedbank included at 100%. The reverse applies when ZAR appreciates.

CAPITAL MANAGEMENT

Capital management policy during Managed Separation:

Provides appropriate flexibility for the period of the Managed Separation, the costs of the process, as well as providing for the significant investment required in each of the businesses.

Intend to pursue a dividend policy which reflects the operational cash generation, investment and liquidity needs of the plc as well as the capital requirements of the underlying businesses.

Targeting dividend cover equivalent to 2.5 to 3.5 times AOP earnings. First interim dividends[1] will be based on cover of 3.0 times AOP earnings in that interim period.

On completion of the debt reduction process, will consider whether there is scope for additional returns to shareholders.

First interim dividend for 2016:

- 2.67pence per share (1% increase)
- Cover ratio 3 times AOP earnings
- Formulaic in line with capital management policy

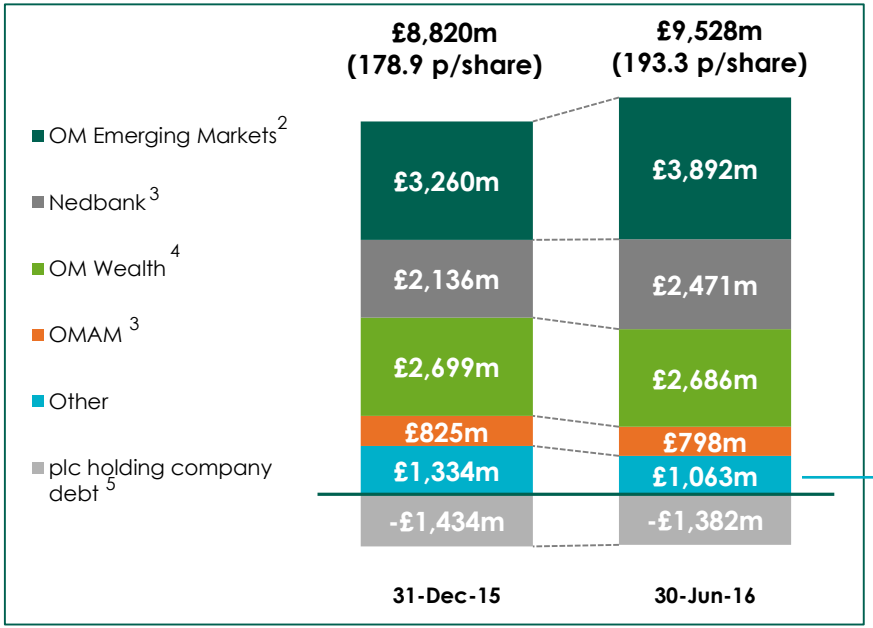
Conservative outlook for 2016 second interim dividend:

- Mid to upper end of cover range
- Maintain flexibility in volatile markets
- Funding business readiness, continued investment and maintaining capital strength

OLDMUTUAL

1. Following implementation of Solvency II, interim dividend renamed as "first interim dividend", final dividend renamed as "second interim dividend".

ADJUSTED PLC NAV[1]



Currency translation added £1bn of value, partially offset by adverse movement in Nedbank and OMAM share prices (£148m) and payment of plc ordinary cash dividends (£315m).
