

Alfen Plus EV Charging Solutions

Eve Single Plus

Key specifications

- › RFID authorisation
- › 3.7–22 kW
- › 3.5" LCD display
- › ISO 15118 hardware ready
- › Ethernet daisy chaining

Eve Double Plus

Key specifications

- › RFID authorization
- › Up to 2x 3.7–22 kW
- › 2x RCD Type B
- › 7" IPS display (1000 Nits)
- › ISO 15118 hardware-ready
- › Ethernet daisy chaining

Twin 5 Plus

Key specifications

- › Triple phase; 11kW or 22kW
- › RFID card reader
- › Dual socket configuration (Type 2)
- › Full-colour HD 7" LED display
- › Dynamic QR code payments
- › Solid metal casing

Alfen Plus EV Charging Solutions

At the heart of Europe's electric future

Built to move
what matters

From powering vehicles to shaping the energy future

Rooted in energy since 1937 and trusted by grid operators across Europe, Alfen is more than a charger supplier — we are your system partner. Combining grid expertise with innovation, our chargers make charging simpler, smarter and more cost-effective. Proven in the field and integrated with 200+ partners, they deliver reliability, easy installation and dedicated support — today and for a future where charging powers Europe's zero-carbon energy system.

Driving progress forward

We continuously innovate to move the market forward — from pioneering ISO 15118-ready chargers in 2022 to today's Plus range, already proven in thousands of public charging points.

Innovation that connects people

Our innovation starts with real needs: easier charging, seamless authentication and smarter energy use. The Plus range offers Plug & Power, AutoCharge and ISO 15118 Plug & Charge — creating simple, user-friendly charging that saves time and costs.*

Part of your energy ecosystem

Every Alfen charger is designed as part of a larger energy ecosystem. With open architecture and 200+ partner integrations, your Plus charger connects seamlessly, optimising energy use today, ready for tomorrow's smart grid.

Proven technology you can trust

Built on the trusted platform behind our successful Twin 5 Plus, the new Plus range combines proven reliability with state-of-the-art features, future-ready by design.

Grid expertise built in

No other EV charging company knows the grid like Alfen. With 85 years of grid expertise, our chargers are designed from the ground up to integrate seamlessly, delivering smarter energy management, maximum uptime and future-proof scalability.

Durable today, ready for tomorrow

Designed for long life, the Plus range combines durable hardware with modular upgrades and regular firmware updates and full compliance with current & future standards, making every Alfen charger a secure investment.

Charging that adapts to you

From home to office to public charging: the Plus range adapts to every setting with flexible configurations, smart load balancing and scalable options that grow with your needs.

Dedicated people, reliable support

Every Plus charger comes with a 36-month warranty and rapid repair service. Extend up to 6 years, choose on-site support in 14 countries, or train your own team via our Authorised Repair Partner programme. With Alfen, support is always close by.

Installation made simple

The new Eve Install app (2026) makes installation fast and simple. Even without Alfen expertise, installers can connect, configure and update multiple stations in minutes, cutting costs, boosting capacity and reducing time on site.

Reliability you can trust, always there

With over 16 years of EV charging experience and 800,000 charge points delivered, Alfen guarantees reliability and continuity — backed by the strength of a listed company active in 30+ countries.

* Specific functionality will not be available at launch but will be added in future firmware releases.
