

Eve
Double
Plus

Future-ready charging for busy locations

The Eve Double Plus is a next-generation smart charging solution that combines advanced EV technology with a robust, durable design you can rely on. Developed for high-traffic, semi-public locations such as offices, retail spaces and hospitality venues, it delivers up to 2x 22 kW through a range of outlet configurations — dual fixed cables, Type 2 sockets, or Type 2 shutter sockets — giving you maximum flexibility for any site.

Its IK10 impact-resistant housing is built to withstand intensive daily use, while the option to wall- or pole-mount allows for straightforward installation in any situation. The Eve Double Plus is also ready for bidirectional charging (V2X) in full compliance with ISO 15118-20, ensuring reliable, future-proof performance without costly upgrades.

To make every charging session smooth and efficient, the Eve Double Plus supports multiple authentication methods, including the familiar Plug & Power and RFID, as well as the latest options such as AutoCharge and ISO 15118 Plug & Charge. Connection with an optional external payment terminal is also possible. These options ensure fast and seamless session starts while helping you save on costs.

Eve Double Plus

Key specifications

- › RFID authorization
- › Up to 2x 3.7–22 kW
- › 2x RCD Type B
- › 7" IPS display (1000 Nits)
- › ISO 15118 hardware-ready
- › Ethernet daisy chaining

Future-ready performance*

Fully prepared for tomorrow's EV technologies thanks to standardized bidirectional charging (V2X) and ISO 15118-20 Plug & Charge authentication, ensuring seamless compatibility with the next generation of vehicles.

Flexible authentication options*

Supports the latest user-friendly methods such as AutoCharge and ISO 15118 Plug & Charge, ensuring a fast and seamless start to every session. Familiar options like Plug & Power and RFID remain available, with the added flexibility of connecting to an external payment terminal.

Cost-effective scaling*

Dual outlets delivering up to 2x 22 kW from a single charging station help minimize installation costs. Active Load Balancing and Smart Charging Network optimize grid usage, enabling expansion without expensive infrastructure upgrades.

Ease of use

A large 7" HD display and integrated card reader make operation simple and intuitive, so charging can start and stop effortlessly.

Seamless network integration

Connects perfectly with both new and existing installations, ensuring maximum flexibility and scalability.

Reliable in all conditions

With more than a decade of proven performance and IK10 impact resistance, this charger is designed to handle demanding environments and continuous use.

Easy maintenance

A modular design allows for quick replacement of components, keeping downtime to a minimum.

*Specific functionality will not be available at launch but will be added in future firmware releases.
