

Eve  
Single  
Plus

# Smart charging for home and office

The Eve Single Plus is a next-generation smart charging solution for home and business use. It combines advanced EV technology with a robust, durable design you can rely on. Delivering up to 22 kW through a single socket — with options for a fixed cable, Type 2 socket, or Type 2 shutter socket — it offers flexible installation on any site, whether wall- or pole-mounted.

A bright and easy-to-read 3.5" HD display, together with the integrated card reader, makes charging simple and intuitive. In addition, the Eve Single Plus supports multiple authentication methods, including the trusted Plug & Power and RFID as well as the latest options such as AutoCharge and ISO 15118 Plug & Charge. This ensures every session starts smoothly and quickly while also delivering valuable cost savings.

Built with tomorrow in mind, the Eve Single Plus is fully prepared for bidirectional charging (V2X) based on ISO 15118-20, giving you the confidence of reliable, future-ready performance without the need for costly upgrades.

# Eve Single Plus

## Key specifications

- › RFID authorisation
- › 3.7–22 kW
- › 3.5" LCD display
- › SO 15118 hardware ready
- › Ethernet daisy chaining

## Future-ready performance\*

Fully equipped for the EV technologies of tomorrow thanks to standardised bidirectional charging (V2X) and ISO 15118-20 Plug & Charge authentication, ensuring seamless compatibility with the next generation of vehicles.

## Flexible authentication options\*

With support for the latest authentication methods such as AutoCharge and ISO 15118 Plug & Charge, the Eve Single Plus enables a fast, seamless start to every session. Trusted options like Plug & Power and RFID remain available, and integration with an external payment terminal is also possible.

## Safe and simple load balancing\*

Connect directly to a smart meter (via P1 or TIC) for Active Load Balancing and Smart Charging Network support, helping to prevent overloading and safeguard electrical safety.

\* Not all features available at launch.

## Wide back-end compatibility

With more than 200 tested back-office integrations, Alfen chargers connect effortlessly to your preferred platform for smooth and reliable remote operation.

## Ease of use

With 2.5 times the brightness of the Pro version, the 3.5" HD display is easily readable even in daylight. Together with the integrated card reader, it makes charging simple and intuitive for every user.

## Durable, built to last

Manufactured in the Netherlands using A-grade components, every unit undergoes extensive testing and certification to deliver robust, safe and dependable performance.

## Efficient installation

Two Ethernet ports enable daisy chaining, reducing cable complexity and making installation faster.

**Built to move  
what matters**
