

A perfect Hybrid
of dreams
and reality

So here it is.

Your Emma Hybrid.

We hope it makes your dreams
come true.

The secrets of perfect sleep.

Say hello to your lovely new mattress.

The award-winning Emma Hybrid has been carefully developed by our very own engineering team. These mattress masterminds worked tirelessly for months to find exactly the right materials and structure for maximum comfort.

Let's see what they dreamed up.

That dark grey side-cover ensures perfect air circulation, with the added bonus of a stylish look. The cover also has non-slip parts that grip the base of the bed, so there's no sliding around.

And the top cover? That's made of special climate control fibre that regulates humidity, for a healthier sleep. Oh, and it's machine-washable so it's easy to keep sparklingly clean.

The perfect sleep from

Foam sweet foam

Our next-generation Airgocell® foam is wonderfully comfortable. Its exceptional point-elasticity allows one part of the mattress to compress without affecting the rest – so even if your partner/dog/cat is a 'lively' sleeper, you'll slumber sweetly on.

Spring into bed

Around 2000 pocket springs work together to gently cradle and support your body in the areas you need it the most. It's also what gives the mattress that lovely 'bouncy' feeling.

Ahhh to Zzzz.

Taking the pressure off

A special visco-elastic foam layer to effortlessly distribute your body weight. Relieving pressure perfectly, it adapts completely to your body and keeps you comfortable however you sleep.

Emma's got your back

We're here to support you – and our HRX foam does just that. Whatever your sleeping position, the firm bottom layer provides essential counter-pressure and comfortably supports your lower back.

Fresh as a daisy

Treat your Emma like your favourite T-shirt: keep it nice and clean. Every 4 weeks, you can wash the top cover at 60 °C and the side cover at 40° C!

A top-down view of a washing machine drum. The drum is filled with water and suds, and the central agitator is visible. The drum is surrounded by a white plastic rim.

Sleep
fact
#273

**We spend roughly a
third of our life sleeping.**

**There's no better place
to do that than on an
Emma mattress.**

**Let the
good times roll**

1. Unpack

Take Emma out of the box, lay it on a flat surface and roll it out.

2. Unwrap

Snip off the plastic wrapper with the handy cutter we've enclosed.

3. Unwind

You're all set to stretch out on your beautiful new mattress. Just wait a couple of minutes to let Emma breathe; fresh air is good for all of us.

Don't worry.

Your mattress comes with a 10-year guarantee*. That's how sure of its quality we are. So in the unlikely event that you have any problems, let us know and we'll swap your mattress for a brand new one.

*T&Cs apply

Sleep happy.

A rushed ten minutes in a crowded shop is no way to choose a mattress. You need plenty of time to decide if everything about it is right for you. And our risk-free trial gives you 100 nights, so relax and enjoy.

How soon is Emma ready to sleep on?

Emma is ready for your first nap a few minutes after it's unpacked. If you prefer, you can leave it to air for a little while longer.

What about cleaning it?

Great news: the cover's washable. So you can look after Emma just like your favourite T-shirt.

Simply open the zip, separate the top and bottom parts, and stick them in the washing-machine at 60° C. You can also wash the side cover at 40° C. Because of the special fibre we use in the covers, they come out only slightly damp and dry fast.

You can also wash small marks off by hand, with warm water and a dab of gentle detergent.

My Emma smells very "new". Is that OK?

Don't worry! Like many other mattresses, yours might have a slight "new" smell to begin with. This will disappear in a few hours – just give Emma some time in a well-ventilated room.
