

- We would like to apply for a license (3.7GHz to 3.8GHz) on our NVIDIA campus (Santa Clara, CA).
- We are expanding our 5G Stand Alone (SA) End-to-End system by adding over-the-air (OTA) capability.
- This indoor, Private 5G system will be used to test the interoperability of NVIDIA's 5G solutions with O-RAN compliant vendors (for example radio unit). The system will include a 5G Core Network, 5G gNB, 5G Radio Unit (O-RU) and 5G SA capable devices (for example smart phone).
- We have provided a map where Building B is the assumed center with a radius of approximately 0.4km.

Measure distance
