

Enfamil® NeuroPro™ EnfaCare® Powder Infant Formula + Term Human Milk

Note: Human Milk Fortifier is the only product intended to fortify breast milk.

- The following instructions are provided as a courtesy. They are based on calculated results of mixing – not clinically or analytically tested.
- Powdered infant formulas are not commercially sterile and should not be used for preterm or immunocompromised patients unless under strict medical supervision as a clinical necessity. Follow all guidelines for preparation and use. Expressed human milk is not sterile; therefore, feed fortified breast milk immediately or store refrigerated for no more than 24 hours.
- Weighing powder provides the most accurate final dilution. Approximate household measurements (level, unpacked) are provided as a convenience when precise dilutions are not required.

Instructions – Add powder to human milk, and agitate to mix.

	22 Cal/fl oz	24 Cal/fl oz	27 Cal/fl oz	30 Cal/fl oz
NeuroPro EnfaCare Powder	0.9 g (~1/2 tsp)	1.8 g (~3/4 tsp)	3.3 g (~1 1/2 tsp)	4.8 g (~2 tsp)
Human milk	2 fl oz (59 mL)			

Estimated Nutrient Content of Mixture per 100 mL

Nutrient	22 Cal/fl oz	24 Cal/fl oz	27 Cal/fl oz	30 Cal/fl oz
Protein, g	1.1	1.3	1.61	1.92
Fat, g	3.9	4.2	4.8	5.4
