**Automating
the World**

Welcome to Mitsubishi Electric

at sps smart production solutions 2025

SMKL – Smart Manufacturing Kaizen Level
Step by step towards the smart factory

SPS – Smart Production Solutions
in hall 6/booth 348.

Stand tour Mitsubishi Electric / sps smart production solutions 2025

▶ Open and smart

State-of-the-art automation solutions for modern production today and tomorrow

▶ EtherCAT Motion Application

The compact and high-performance MR-J5 servo drives with EtherCAT.

▶ Automation tableau

Here we present our existing and new product solutions

▶ Linear transfer system

European premiere of the new transport system based on our powerful servo technology

▶ Rubik's Cube servo application

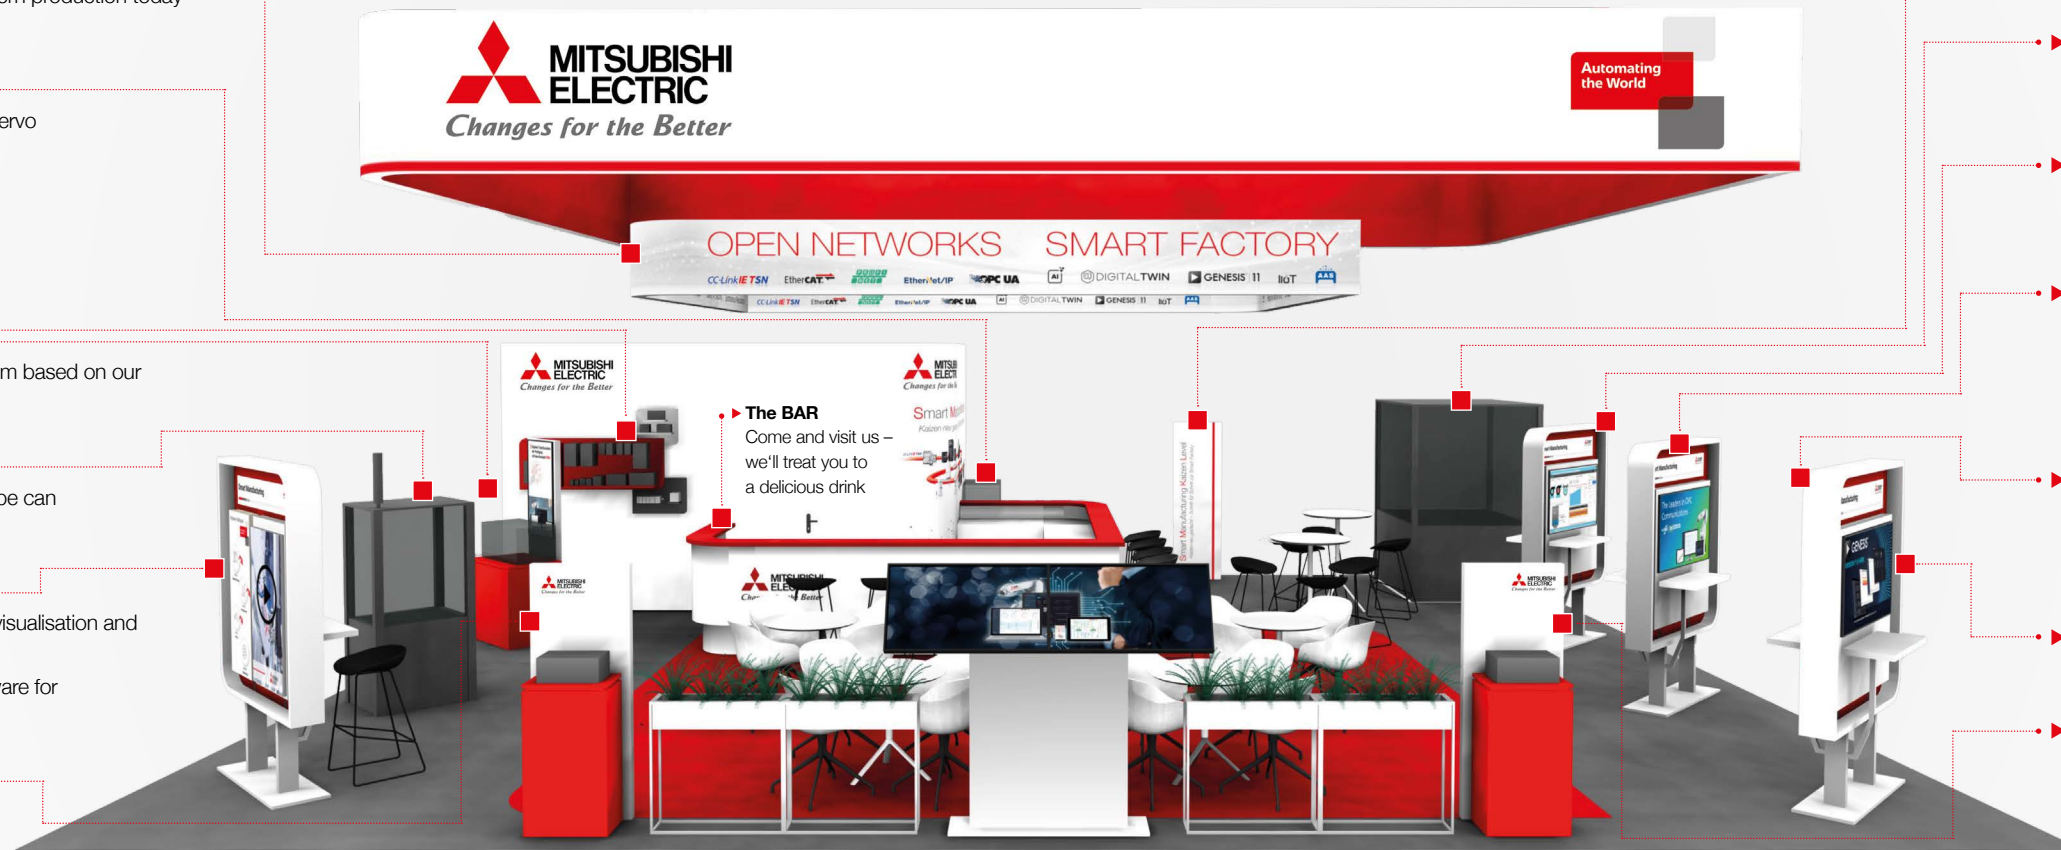

Thanks to high-speed servos, the Rubik's Cube can be solved in just 305 milliseconds

▶ New products

- See the new products for PLC technology, visualisation and drive technology
- MELSOFT VIXIO - AI-supported vision software for error-free automation

▶ NEW: FR-D800 inverter

More compact, more efficient, more flexible: the successor to the successful FR-D700 for modern production environments

▶ New EM-A motor with TRAMEC gearbox solution

Energy-efficient and cost-effective positioning with frequency inverters and the new EM-A motor series

▶ Taktomat robot application

Upside-Down mounting of the MELFA articulated arm robot on an additional axis with vibration suppression!

▶ SMKL – Collecting data

- GEMINI V11 with AI-supported project planning
- MELSOFT software solutions from Mitsubishi Electric

▶ SMKL – Visualising data

- MESALOGIC makes the invisible visible. Visualisation options for all industries
- Mitsubishi Electric ICONICS Digital Solutions with GENESIS V11

▶ SMKL – Analysing data

- Coordinate holistic data access at all levels with TAKEBISH
- Genesis V11 as the central platform for the digitalisation of your production and systems

▶ NEW: GOT HMI3000

The new way of visualisation

▶ NEW: MX Controller

The new compact and modular PLC platform – the mastermind of manufacturing
