

Notice of EU RoHS Directive on Servomotor

■ Date of Issue

April 2025

■ Relevant Models

Servomotor

We would like to express our sincere gratitude for your continued patronage of our Mitsubishi Electric Servomotor.

Recently, it was found that the load-side bracket used for the servo motors exceeded the permissible limit value of a certain phthalate ester (DEHP) restricted by the EU RoHS directive.

There is no impact on the quality, function or performance of the product, nor on the environment or health, and there is no problem with its continued use.

However, if you plan to deliver equipment incorporating the target product to Europe, or if you have already delivered the target product to Europe, there are precautions. See below for details.

⌚ When products are scheduled or have been delivered to Europe For inquiries, please consult your nearest branch office or the distributor.

3 When products are scheduled or have been delivered to Europe

3.1 When Delivery to Europe Is Scheduled

If you plan to deliver equipment incorporating the target products to Europe, please consult our branch office or the distributor.

3.2 Products delivered to Europe

When disposing of products in Europe, ask a disposal company that can handle them properly.

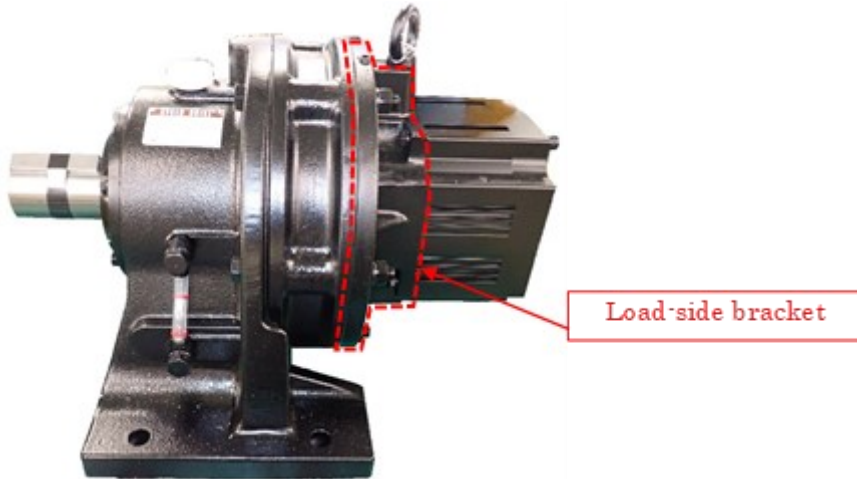

When disassembling the product at the time of disposal, use protective equipment and avoid direct contact with the primer paint.

In any case, during product use, the primer coating will not directly encounter the human body.

See below for the location of the relevant parts for product.
