

**Surrogacy Consultations**

Both the intended parent(s) and the host must have a consultation pre- treatment

Registration fee We charge a one-off, non-refundable fee to cover the time we invest in working with you to plan and organise your surrogacy pathway	560
Initial consultation for Intended Parent(s)	260
Initial consultation for surrogate	239

**Recommended surrogacy pre-consultation screening**

If you have had an AMH test or scan within the six months or a diagnostic semen analysis test within the last year you can share the results with your chosen Care clinic these tests won't usually need to be repeated

Diagnostic semen analysis for the sperm provider(s) (only required if an IP is providing sperm for treatment. If both IPs are potential sperm providers both will need a DSA)	175
Detailed 3D pre-treatment scan for surrogate	220
Detailed 3D pre-treatment scan for egg provider (only required if an IP is providing eggs for treatment)	220
Anti-Mullerian Hormone level blood test for egg provider (not required if using donated eggs for treatment)	140
Thyroid stimulating hormone blood test (TSH – optional) for egg provider and surrogate	60
Vitamin D level blood test for egg provider and surrogate (optional)	78.0

**Treatment costs**

The tables below set out the likely typical cost of the surrogacy treatments provided by Care.

<b>Intrauterine Insemination (IUI) of surrogate host (straight surrogacy):</b>	
IUI treatment treatment cost covers; consultation and planning with a Care donation expert; monitoring scans; thawing and preparation of sperm; insemination; pregnancy scan or post treatment review appointment; counselling support.	4,150
Infectious screening for the sperm provider Cost includes screening at the time the sample is provided and post quarantine.	1,673
Freezing of sperm It is a requirement that the intended parent's sperm is frozen for a three-month quarantine period after which the IP must undergo repeat infectious screening before the sperm can be used. Price is per person requiring semen freeze	125
Storage of frozen sperm (annual charge)	380
Storage of frozen sperm (monthly direct debit)	31.67
Estimated drug cost 50% of our patients pay less than £40 for their drugs in an IUI cycle For the remaining 50%, the typical cost of medication is £375, but in rare situations a treatment may require medication costing up to £771. The type of cycle we recommend depends on medical history and the results of tests carried out as part of pre-treatment planning.	
HFEA fee only applicable if using donated sperm	40.0

<b>IVF surrogacy</b>	
IVF with fresh transfer to surrogate	
treatment costs include; consultation and planning with a Care donation expert; in treatment monitoring scans and blood tests; sperm thaw and preparation; egg collection with conscious sedation or local anaesthetic or thaw of donor eggs; embryo creation and culture; embryo transfer; pregnancy scan or post treatment review appointment; counselling support.	7,960
IVF with freeze of all embryos	
treatment costs include; consultation and planning with a Care donation expert; in treatment monitoring scans and blood tests if IP providing eggs; sperm thaw and preparation; egg collection with conscious sedation or local anaesthetic or thaw of donor eggs; embryo creation and culture; freezing and one year's storage of all frozen embryos. Frozen embryo transfer to surrogate is not included.	4,980
Infectious and genetic screening for the sperm provider	
only applicable if using the IP's sperm	1,673
Storage of frozen sperm (annual charge)	380
Storage of frozen sperm (monthly direct debit)	31.67
Infectious and genetic screening for the egg provider	
only applicable if using the IP's eggs	1,543
Infectious screening for the surrogate	
Rubella and chlamydia screening	100
Standard infectious screening	215
Estimated drugs costs	
All of our patients have a personalised treatment plan with drug costs between £935 and £2600. An estimated 25% of patients are prescribed drugs costing £935 and 25% £2595 with 50% of patients prescribed drugs costing somewhere in between these two figures.  When treatment is successful, we prescribe additional medication known as "luteal support "up to the 10 <sup>th</sup> week of pregnancy. The typical additional cost of luteal support medication is £115	
HFEA fee	100
Intracytoplasmic sperm injection (ICSI)	
This is required if using IP sperm and the results of the sperm providers diagnostic semen analysis or previous treatment history indicate it is needed.	1,395

<b>Additional cost of donated eggs</b>	
<ul style="list-style-type: none"> <li>with fresh donated eggs</li> </ul>	
If there are fewer than nine eggs in a fresh donation cycle, then a refund of £3,000 will be given	7,010
<ul style="list-style-type: none"> <li>a set of 6 frozen donated eggs from the Care egg bank</li> </ul>	
We require a require a part payment of £1,090 of your treatment fee to secure the allocation of your chosen eggs and their transfer to your treating Care clinic. We only guarantee the availability your selected eggs for 3 months and if they are not used in treatment within that time, they may not be available. The part payment is non-refundable but can be used against any future treatment.  ICSI is included in costs as standard when using frozen eggs from Care's egg bank	3,140
<ul style="list-style-type: none"> <li>a set of 9 frozen donated eggs from the Care egg bank</li> </ul>	
We will require a part payment of £1,090 of your treatment fee to secure the allocation of your chosen eggs and their transfer to your treating Care clinic. We only guarantee the availability your selected eggs for 3 months and if they are not used in treatment within that time, they may not be available. The part payment is non-refundable but can be used against any future treatment.  ICSI is included in costs as standard when using frozen eggs from Care's egg bank	7,010
<ul style="list-style-type: none"> <li>eggs from a known donor</li> </ul>	
This fee excludes the cost of the donor's initial consultation, pre-consultation screening tests, drugs and infectious screening.	1,890

<b>Additional cost of donor sperm</b>	
Donor sperm for Care's sperm bank Includes donor matching, reservation and transfer of donor sperm to your chosen Care clinic and donor sperm for one treatment cycle	1,280
Import of donor sperm purchased from a partner sperm bank (includes one year's storage)	385

<b>Frozen Embryo Transfer</b>	
Frozen embryo transfer (FET) Treatment costs include; nurse planning; monitoring scans for the surrogate having; in treatment blood tests; embryo thawing and culture; embryo transfer; pregnancy scan or post treatment review appointment; counselling support.	
Frozen embryo transfer (FET) to host of Care created embryos	3,340
First frozen embryo transfer (FET) to host of externally created embryos	5,150
Subsequent (FET) to host of externally created embryos	3,340
Drug costs Patients having transfer of frozen embryos are typically prescribed drugs costing between £150 and £410 to prepare their uterus for embryo transfer. When treatment is successful, we prescribe additional medication. This cost of this further luteal support medication is £225.  Our research has shown that 33% of our patients don't absorb enough progesterone medication from pessaries. In these patients we recommend use of injectable progesterone as "rescue luteal support". The cost of this medication is £795.	

<b>IVF recommended supplementary procedures</b>	
Extended culture and blastocyst transfer	540
CAREmaps You can find information about our in-house embryo selection algorithm on our website and in written information available from your chosen Care clinic	995
Freezing of embryos remaining after fresh embryo transfer We highly recommend patients plan for the cost of freezing embryos remaining after fresh transfer as this allows further frozen embryo transfer treatment without repeating all of the medical interventions or incurring the costs of a full treatment cycle. This option gives our patients the best chance to have or complete a family. Freezing does not include the cost of storage which must be paid in addition.	345
Storage of frozen embryos (annual charge)	380
Storage of frozen embryos (when paid by monthly direct debit)	31.67

<b>Preimplantation Genetic Testing (PGT-A)</b>	
This is an optional embryo selection treatment. PGT-A can only be provided in an elective freeze all IVF treatment cycle.	

<b>PGT-A (within a treatment cycle)</b>	
PGT-A fee The fee includes treatment set up, biopsy set up and CAREmaps. Extended culture and ICSI (if required) are not included in the fee	1,360
PGT-A fee per embryo biopsied	355 per embryo

<b>PGT-A (testing of previously frozen embryos)</b>	
Embryo thaw, biopsy, and refreeze fee includes embryo thaw, treatment set up, biopsy set up.	1,280
PGT-A fee per embryo biopsied	355 per embryo

### Specialist treatment options

Care offers several treatments at patient request only or to a small number of patients based on their individual medical history or previous fertility cycle outcome or pre-consultation screening tests

Artificial oocyte activation (AOA)	165
Assisted hatching	580
CareUnity testing1 gamete provider only	190
CareUnity testing both gamete providers	240
EmbryoGen	520
EmbryoGlue	150
Endometrial scratch	310
ERA	1,300
EMMA, ALICE,	1,495
Sperm chromosome screening (aneuploidy)	695
Sperm aneuploidy and DNA Fragmentation Index (DFI)	1,360
Sperm Oxidative Stress (SOS) test	110
Triome testing (combined ERA, EMMA and ALICE screening)	1,770
ZyMot sperm selection	230

### Transfer-in fees

#### Transfer-in fees

Transfer-in of patient sperm/eggs/embryos from a Care clinic Patients are responsible for payment of fees charged by couriers for the movement of sperm/eggs/embryos	Nil
Transfer-in of patient sperm/eggs/embryos from a UK-based non-CARE clinic (provided treatment commences within one year of transfer)	Nil
Transfer-in of patient sperm/eggs/embryos from an overseas clinic (inc VAT) Patients are responsible for payment of fees charged by couriers for the movement of sperm/eggs/embryos	240
Personal import of donor sperm for named patient (includes up to one year's storage free of charge) Patients are responsible for payment of fees charged by couriers for the movement of sperm	385

### Treatment Cancellation Policy

Occasionally treatment cycles are cancelled. The information below sets out the most common scenarios and the amount payable in each case:

#### Frozen embryo replacement, IUI

Cancelled at the monitoring stage	625
-----------------------------------	-----

#### IVF

Cancelled at the monitoring stage	830
-----------------------------------	-----

#### IVF with donated eggs

Cancelled at the monitoring stage	915
-----------------------------------	-----

If treatment is cancelled post-monitoring but before embryo replacement, then a refund will be paid to the patient as follows:

Failed egg recovery (plus HFEA fee refund)	565
Failed fertilisation/cleavage	485
Failed frozen embryo thaw (plus HFEA fee refund)	920

#### PGT-A

The PGT-A fee is refundable in full if a failed egg recovery/fertilisation/cleavage occurs.	1,360
A partial refund is available if embryos are cultured, but none are biopsied.	365

#### Payment Options

Treatment fees are paid before the treatment starts. Bank transfer, debit and credit cards are accepted methods of payment. Our preferred method is by debit card.

In cases where your health insurance may fund consultations and investigations, you must pay the fees directly to CARE and then claim the cost back from your insurer. We are unable to negotiate claims directly with health insurers.

CARE reserves the right to amend prices. If you have a consultation with Care and agree to a recommended course of treatment, we will provide you with a fully costed treatment plan and an invoice that sets out the cost of the medications we recommend. Once the treatment and medication invoices are paid, we will provide treatment for the agreed price, which will not change unless we give you six months' notice. If we implement price changes before you have paid your invoices for treatment then we will provide you with an updated costed treatment plan and invoices so that we can expressly agree the cost of treatment with you before you enter into a contract with Care by paying for your treatment and medication.

**Effective from 1 April 2024.**
