Commitment to achieving net zero

Reckitt is committed to achieving net zero emissions across our value chain by 2040.

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline year: 2015 *published data available in Reckitt ESG Data Book: Tab Environment Metrics
Additional details relating to the baseline emissions calculations:

- 65% absolute reduction in operational (Scope 1 & 2) GHG emissions by 2030 vs 2015
- 50% absolute reduction in Scope 3 GHG emissions by 2030 vs 2015

Baseline year emissions:	
Emissions	Total (tC02e)
Scope 1	118,340 (tC02e)
Scope 2 (market-based)	283,304 (tC02e)
Scope 3	8,573,673 (tC02e)
Total emissions	8,975,317 (tC02e)

Current emissions reporting

Reporting year: 2025	
Emissions	TOTAL (tCO2e)
Scope 1	101,489 (tCO2e)
Scope 2 (market-based)	6,167 (tCO2e)
Scope 3	7,577,749 (tCO2e)
Total emissions	7,685,405 (tC02e)

Full breakdown of Scope 3 emissions, including all relevant categories is provided within the ESG Databook and Annual Report (page 44)

Emissions reduction targets

In support of our net zero ambition, we have adopted the following science-based GHG emission reduction targets covering Scopes 1,2 and 3:

- 65% absolute reduction in operational (Scope 1 & 2) GHG emissions by 2030 vs 2015 (SBTi validated)
- 50% absolute reduction in Scope 3 GHG emissions by 2030 vs 2015 (SBTi validated)
- 100% renewable electricity by 2030
- 50% reduction in absolute product carbon footprint by 2030 vs 2015

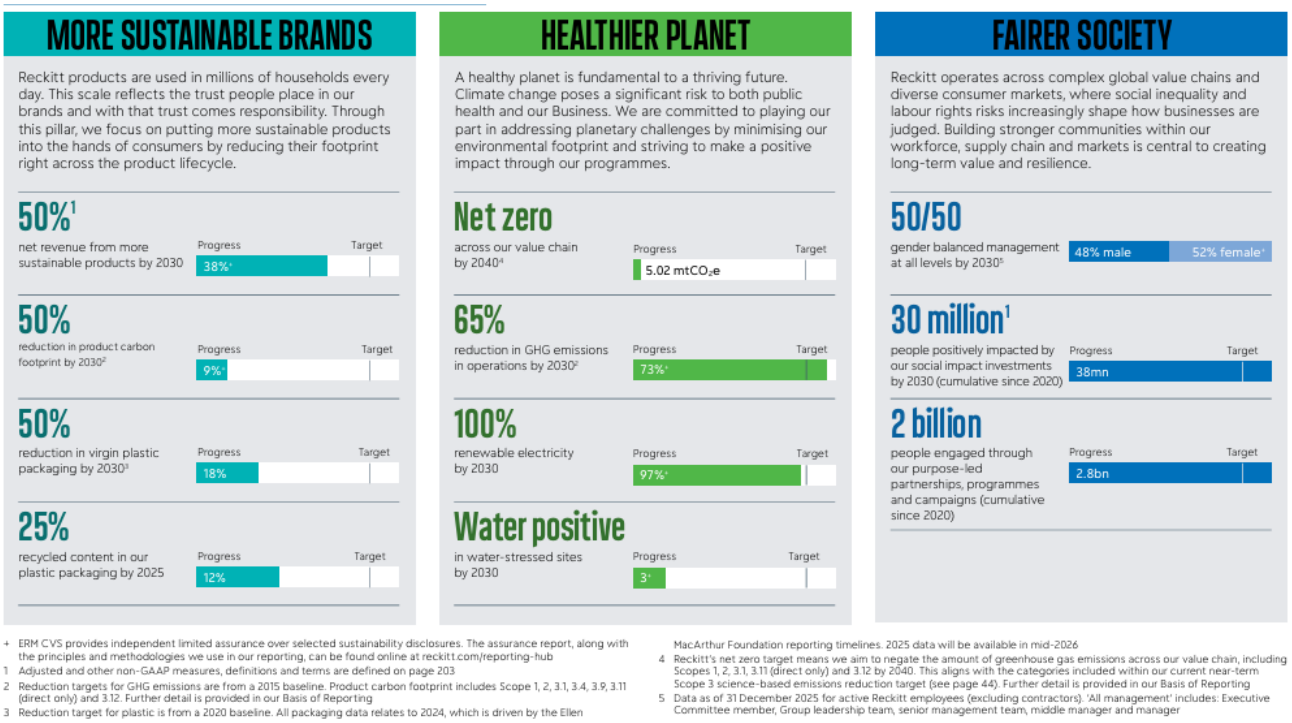

Climate Transition Strategy

The climate crisis demands decisive and immediate action if we are to reverse the decline of nature and address the widening health inequalities and water access issues exacerbated by rising global temperatures. Our top priority is delivering our climate transition plan, which sets a path to net zero across our value chain by 2040. This strategy focuses on seven priority areas:

In the near term, we are focused on meeting our SBTi validated science-based targets and accelerating progress on Scope 3 emissions by 2030 - the area where most of our impact lies (98.5%). Beyond emission reduction, we are also strengthening our understanding of the climate-related risks and opportunities we are exposed to, directly and indirectly. We conduct climate-risk modelling and scenario analysis that inform risk management and decision making across the Group.

This dashboard summarises our published 2025 performance against our key Sustainability Ambitions. A full performance breakdown can be found in our ESG Data Book, available at reckitt.com/reporting-hub.

Completed carbon reduction initiatives

We continue to make progress against our carbon reduction targets.

Scope 1 & 2 operational emissions have reduced by 73% vs 2015, driven by energy-efficiency projects, renewable electricity procurement (97% of electricity is renewable) and manufacturing improvements across our global network.

Scope 3 value chain emissions have reduced by 8% vs 2015 through supplier engagement activities, improved data quality and targeted reduction projects with priority categories such as packaging and logistics.

These initiatives will be in effect when performing the contract.

Reckitt has achieved the following CDP ratings in 2025: Climate A

Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate

standard[13] and uses the appropriate government emission conversion factors for greenhouse gas company reporting.[14]

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.[15]

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the supplier:

Russell Taylor (Nov 2, 2026 15:59:17 GMT)

SVP Northern Europe
