Direct Costs

Spread and Commission

The difference between the bid and ask price is known as the spread. The spread can vary depending on a wide range of market conditions. Pepperstone offers two trading accounts, a) Standard and b) Razor and the costs for trading are dependent on the trading account and trading platform you hold with us. Both account types will have minimum spread. In most cases Pepperstone will charge our spread on top of the market spread which is the fee for trading and shown as a total spread on the trading platform. Spread charges are applied to most of our products such as Forex, Indices, Metals, Cryptocurrency and Commodities. Share CFD trades are charged a commission in addition with any spread which differs by underlying exchange.

Standard Account

Pepperstone's Standard Account has a minimum of 1 Pip mark-up to the spread reflected on the Razor account for FX pairs, instead of a separate commission charge. For a standard account the cost of trading is reflected in the price (Bid/Ask Spread) with the exception of Equities which are charged a commission rate dependent on the underlying exchange.

Standard Account - Swap-free

In some regions and at the discretion of Pepperstone, we offer a swap-free account for clients. This account type does not incur overnight funding or swaps. An administration fee is charged on any position open for 5 days for each 5-day period, see Administration Fee in the Schedule. The cost of trading is calculated as in the Standard Account, with the exception of Admin charges being levied in lieu of Swap or Overnight funding charges.

Razor Account

Our Razor account charges a commission on all FX and spot gold (XAUUSD) trades, the rate of which is dependent on your account currency (please refer to the Razor Commissions Schedule for full details). In addition to any commission, you will also be subject to a market spread or minimum spread. The commission structure varies by platform: on cTrader, commissions are charged at USD \$6 round-trip for FX trades and USD \$7 round-trip for spot gold (XAUUSD) – for example, a trade of 100,000 EUR/USD would incur a charge of USD \$3.00 to open and USD \$3.00 to close. On the Pepperstone Platform, commissions are charged at USD \$7 round-trip for FX and Spot Gold (XAUUSD) trades – for example, a trade of 100,000 EUR/USD would incur a charge of USD \$3.50 to open and USD \$3.50 to close. On MT4 and MT5, commissions are based on your chosen account currency and lot size, with applicable rates of USD \$7.00, GBP £4.50, EUR €5.20, or CHF 6.60 per round-trip. Where your trading account is not denominated in USD, all USD-quoted commission charges will be converted to your nominated account currency at the prevailing foreign exchange rate. Please note that for all platforms, commissions on index, metals (excluding spot gold), cryptocurrency, and soft commodity markets are reflected in the spread, with no separate commission charge applied.

Share CFD Commission

Pepperstone applies commission on Share CFDs which depends on the country the company is listed and the underlying exchange. Examples of the commissions per country can be found in the tables in the Schedule. Please visit the website of the up to date commissions. Note that if the amount is less than the minimum charge, the minimum charge will apply instead.

Formula for Commission per side = Contracts x Price x Commissions % and if applicable conversion from corresponding currency to account currency.

Other charges

Overnight funding and swaps

Overnight funding is a charge for holding a position in equities, commodities, crypto, metal or index markets and a swap for forex positions over server rollover; which is 5pm New York (23:59 Server Time). We review & update our swap charges frequently and clients should check the "Specifications" section on MT4/5 and cTrader platforms for our most up-to-date swap rates as these are updated in line with the underlying market. Additionally, in the "Specifications" section you can find all relevant information for the notional values for Metals, Commodities etc. Please note for the Pepperstone platform, this is only available on Webtrader and not on the mobile app. Instructions can be found on our website [here](#).

Forex and Metals

Pepperstone's Forex overnight funding or swap as displayed in the platform is calculated by using the TomNext rate provided by our liquidity providers with an admin fee. These rates are updated as the underlying TomNext rate changes.

Daily swap charge / credit = One point x (Trade Size [or notional value] x TomNext¹ including funding fee²)

Indices and Share CFDs Overnight funding.

Pepperstone calculates overnight funding for Indices based on Alternative Reference Rate (ARR) or the equivalent interbank rate (IBOR).

Formula for indices overnight funding is: Nights held x (market close price at server rollover x trade size [or notional value] x (ARR +/- admin fee³)/360

Commodities and Treasuries

Daily swap charge / credit = trade size [or notional value] x (basis* +/- our charge**))

*Formula for the basis = (P3 – P2) / (T2 – T1), where:

P2 = price of front-month future

P3 = price of next-month future

T1 = expiry date of the previous front-month future

T2 = expiry date of the front-month future

**Our charge = CFD mid price x 2.5% / 365. If you pay the basis on your trade, our charge is added; if you receive the basis, the charge is deducted.

Cryptocurrencies

For long or short positions and for any cryptocurrency Pepperstone will debit or credit a daily overnight funding charge for positions held at midnight (00:00:00) server time. The rate is charged on a per annum basis calculated daily, the rate can be found in the Specifications section on the trading platform(s).

Contract Roll Adjustments

Some CFDs will be priced referencing an underlying assets that have set expiry dates (Futures/Forwards). Once the relevant underlying asset has expired, we need to change the underlying contract that we derive our price from. We'll issue a cash adjustment on your account in consideration of the difference in price between the two contracts as well as the cost of closing out your original contract and re-opening it in a new contract.

If the price of the new contract is at a premium / higher price, long contracts at the time of expiry will receive a negative adjustment, whereas short contracts at the time of expiry will receive a positive adjustment. If the price of the new contract at the time of expiry is at a discount / lower price, long Contracts at the time of expiry will receive a positive adjustment, whereas short contracts at the time of expiry will receive a negative adjustment.

¹ TomNext rate is derived from our liquidity providers from the underlying market.

² Funding Fee is the TomNext rate annualised in points marked-up by upto 3%.

³ Admin fee is 2.5%

Formula for contract roll fees is: For Long Positions (Expired contract bid price – new front month Ask price) , For Short Positions (Expired contract Ask price – new front month Bid price)

For example, you've bought 2 lots of a cocoa CFD which expires. The last traded bid price for the underlying futures contract is \$2,924 USD and the next front running Ask price is \$2,914USD. This means that we'll credit your Account \$10 USD, calculated as follows: $(2924 - 2914) = \$10\text{USD}$.

The expiration date of contracts is available on the instrument specifications section of your trading platform and will appear within the instrument description.

Dividends on Indices and Shares⁴

A dividend is a distribution of a portion of a company's earnings to its shareholders. Dividends are often issued as cash payments if you own the underlying share, although they can also be paid out to investors in the form of additional shares. For trades and positions held in one of our index CFDs or share CFDs past the ex-dividend date of the individual share, or of one of the shares that make up the index, Pepperstone will make a cash adjustment to the trading account to reflect the dividend payment.

For long positions index or share CFDs Pepperstone will credit the trading account while for short positions Pepperstone will debit the trading account. The rate of the dividend and the subsequent cash adjustment will reflect underlying market conditions, as well as the value of any withholding tax amounts on the stock. For this reason, the cash adjustment may not be the same as the exact value of the dividend itself.

Where a company issues stock in lieu of dividends and Pepperstone at its discretion may provide a cash adjustment to the value of the stock distribution less any withholding tax.

Where a company conducts a spin-off and a holder has rights to the new stock Pepperstone may provide a cash adjustment to the value of the spin off stock at the disclosed market value of the new stock prior to public trading in such circumstances that Pepperstone is unable to offer the new stock.

Investors shall check regularly for dividends and/or shall consult our dedicated page for dividends on [Index CFDs](#)⁵ and [Share CFDs](#)⁶.

Administration fees

At Pepperstone's discretion we offer a swap-free account to some clients, due to personal or religious reasons. The swap-free account does not incur swaps, rather has a set admin fee charged every 5 days that a position is held open. The administration fee is available in the Administration Fee Table.

For clarity, positions held up to 4 days will not be charged with an administration fee. The charge occurs on the 5th day and thereafter if the position is held more than 5 days on the 10th day, 15th day and so on.

Inactivity Fees

Pepperstone does not currently charge an inactivity fee. We believe that traders should be able to trade when the market suits them. While trading accounts without a balance (or with a balance below 10 USD) will be archived⁷ after 90 days of not trading, we can reinstate the accounts with the remaining balance (if any) any time for you. If we decide to impose inactivity fees in the future, we'll let you know.

⁴ Dividends are not considered a cost or a charge. They are only referenced here for informative reasons. They are a corporate action passed on to the investors depending on if they are long or short a stock or an index.

⁵ Expected dividend adjustments stated in our website are in full index points per contract. Figures stated are forecast amounts sourced via Bloomberg. The final adjustment may differ from the forecast amount previously displayed.

⁶ Expected dividend adjustments stated in full points per share. Long positions on US Equities will incur a 30% withholding tax adjustment.

⁷ Archived accounts are temporary disabled accounts that are not viewable or operational for the client until they are reinstated.

Funding and Withdrawal Fees

Pepperstone does not charge funding and withdrawal fees, however, your bank may charge an administration / conversion / intermediary fee. It is always best to check with your financial institution about any charges that may be incurred when transacting with Pepperstone.

Schedule

Tables with Costs & Charges

The tables below are representations and examples of Pepperstone's costs and charges. All these costs and charges are subject to change please refer to our website or contact the support team at support@pepeprstone.com to make sure that you hold the most current information. For up to date details of our minimum and average spreads on all instruments please refer to our website ([Forex](#), [Indices](#), [Commodities](#), [Cryptocurrencies](#) and [Currency Indices](#)).

Razor commissions for Forex pairs

MetaTrader 5 Razor Commissions

Trading Account Currency	Commission per 1 Lot (100 000 units)	Commission per 0.01 lots (1000 base currency ⁸)
USD	USD 3.50 (USD 7 round turn)	USD 0.04 (USD 0.08 round turn)
EUR	EUR 2.60 (EUR 5.20 round turn)	EUR 0.03 (EUR 0.06 round turn)
GBP	GBP 2.25 (GBP 4.50 round turn)	GBP 0.02 (GBP 0.05 round turn)
CHF	CHF 3.30 (CHF 6.60 round turn)	CHF 0.03 (CHF 0.06 round turn)

MetaTrader 4 Razor Commissions

Trading Account Currency	Commission per 1 Lot (100 000 units)	Commission per 0.01 lots (1000 base currency)
USD	USD 3.50 (USD 7 round turn)	USD 0.04 (USD 0.08 round turn)

Instrument	Contract size per lot	Minimum spread	Average spread ¹¹
Spot Crude	100 barrels	2.0	2.4
Gasoline	1000 gallons	3.0	3.0
Cocoa	1 metric tonne	9.0	9.0
Coffee	10,000 lbs	3.0	3.0

Cryptocurrencies

Instrument	Symbol	Minimum spread	Average spread
Bitcoin	BTCUSD	15.3	33.74
Ethereum	ETHUSD	3.00	3.02
Litecoin	LTCUSD	2.5	3.2

⁹ Commodity CFD spreads are quoted in points with reference to the equivalent underlying market contract.

Share and ETF CFD commissions

Share denomination	Commission (per side)	Minimum charge
US	0.02 USD	-
DE	0.10%	-
UK	0.10%	-
AU	0.07%	-
HK	0.2%	45HKD ¹⁰
EU	0.1%	-

Administration fees

Instruments	Admin Charge (USD) per lot, per 5days
FX and Precious Metals	100

¹⁰ Commission charged in base account currency, for all none AUD accounts the following commissions apply: GBP 2.84, USD 3.87, EUR 3.19, CHF 3.44.

Examples – illustration of estimated fees and charges

Spreads / commissions - Example 1

Account Currency: USD Traded Currency: EURUSD Account type : Razor
Platform : MT4 Volume : 1 Standard lot (100 000 units) Spread : 0.4 pips

Formula : Volume * point size*spread meaning 100 000*0.0001*0.4 = 4 USD

Commission : As per [above table](#) 7 USD.

In case the position is not held overnight charges will be 11 USD in total for the position +/- any profit/loss.

Swaps for FX – Example 2

Account Base: AUD Size 1 Lots (100,000) Nights Held: 1 Currency Pair: AUDCAD
Exchange Rate: 0.89156
Pepperstone Swap Short: 0.67 Long: -3.82
One Point: 0.00001

Formula for forex overnight funding is: Number of nights held x (TomNext¹¹ including funding fee¹²) x trade size.

TomNext Rate 10/02/2022: Bid: 0.0000069 Ask: 0.0000371

TomNext Converted into MT4 Points: Short: 0.69 Long: -3.71

TomNext Including Mark-up: Short: 0.69 – (3%*0.69) Long: -(3.71 + 3%*3.71)

Pepperstone Swap: Short: 0.67 Long: -3.82

If the position is held overnight by the client :

Swap Long to be debited $1 * (0.00001/0.89156) * (100,000 * -3.82) = \-4.28

Swap Short to be credited $1 * (0.00001/0.89156) * (100,000 * 0.67) = \0.75

Swap for Indices - Example 3

Formula for indices overnight funding is: Nights held x (market price at server rollover x trade size x (ARR +/- admin fee¹⁴)/360

Index: US30 Account Base: USD Trade Size: 1 contract (\$44 500 USD) ARR : USD 1 Month: 4.31847
Pepperstone Admin fee: +/- 2.5% Overnight funding Long: -6.82% (= - 4.31847 - 2.5%)
Short: +1.82% (= 4.31847 - 2.5%)

Funding Long: $(\$44 500 * -6.82\%)/360 = \-8.43

Funding Short $(\$44 500 * 1.82\%)/360 = \$+ 2.25$

¹¹ TomNext rate is derived from our liquidity providers from the underlying market.

¹² Funding Fee is the TomNext rate in points multiplied by 3%

Swap for Crypto - Example 4

Pepperstone swap rate

Long -22.5% yearly charge

Short +7.5% yearly charge

Trade Size: Long 1 contract (price of 95,000) Crypto: BTCUSD
(1 x 95000) * -.225 /360 = -59.375 USD of charge per day

Trade Size: Short 1 contract (price of 95,000) Crypto: BTCUSD
(1 x 95,000) x 0.075 /360 = 19.79 of credit per day

Commissions Shares – Example 5

Long trade Woolworths (AU Share) Volume: 200 contracts Open Price 41.20 Account currency = GBP
 $200 \times 41.20 \times 0.0007 = 5.768$ AUD convert to GBP commission = 3.21GBP

The commission 3.21 GBP is larger than the minimum commission of 2.84GBP (5 AUD equivalent). As a result, 3.21 GBP will be charged.
