

HIP-S 1000 Pro

Pro-spec Spring-loaded Hand Installation Pincer

Hand pincer with different head options for the assembly and disassembly of various Oetiker clamps

Uniform pincer design: enables consistent operation across various types of clamps
Robust handle with comfort grip: provides a secure and comfortable hold
Improved inlying spring: ensures an even distribution of force

- Increases usability through a familiar design
- Reduces hand fatigue and enhances work efficiency
- Lower investment on maintenance
- Safe and easy to use

HIP-S 1000 Pro is an innovative solution for efficient tool management, offering a range of benefits for technical applications. Featuring an optimized spring-loaded mechanism, this tool ensures uniform force distribution, leading to precise and reliable results.

The universal handle platform allows the pincers to be offered in various configurations. Depending on the application, the head can be adapted accordingly for the customer. This enables the assembly of clamps 168 (excluding Type 3), 194, or 195. Additionally, the pincer can be configured to disassemble clamp 292.

Designed for maximum comfort, the new handle reduces hand fatigue and enhances work quality by providing a secure and comfortable grip. The handles also feature improved resistance to breakage, ensuring a safer working environment for workers. This further increases their durability and reliability.
