

Reliable Connections.
Powered by Innovation.

The Future of Connecting Technology.

80 YEARS
AND BEYOND

A Legacy of Innovation. A Focus on the Future.

Oetiker is a global leader in the design and manufacture of high-end connecting solutions for mobility and a wide range of industrial applications.

We believe that reliable connections are essential to both the safety and the performance of our customers' products. We are passionate about developing new, innovative and sustainable solutions that meet the ever-changing needs of our customers.

Oetiker's advanced connecting technologies are used by billions of people every day.

Oetiker's advanced connecting technologies are used by billions of people every day, giving them Peace of Mind knowing that the connections they rely on are safe and reliable. From charging electric vehicles, to driving to school, or receiving lifesaving medical treatment and much more; details like a reliable connection make all the difference. Since 1942, Oetiker has been developing innovative connecting technologies that enhance the safety and performance of the products that our OEM partners create, making a positive impact on our daily lives.

Family-Owned Company Dedicated to Customer Value.

As a family-owned business with a legacy of technological leadership, we put our customers' at the heart of everything we do. With an eye to the future, we understand our customers' current and changing needs, and we continuously innovate and improve our products and services to meet those needs.

Founded in Horgen, Switzerland by
Mr. Hans Oetiker.

Company Values

Oetiker's values guide our long-term global perspective and drive us to be regarded as a trusted partner to OEMs and Tier One Suppliers. Oetiker is built on the vision and leadership of our founder and the ongoing success of our customers'. We are committed to our values, employees and sustainable business practices. We look forward to serving our customers' and growing our business well into the future.

Partnership & Proximity: We are a trusted partner of OEMs and Tier One suppliers, providing global production, local support and supply chain security.

Leading Edge Technology: We are constantly innovating to develop new products and solutions that meet the needs of our customers.

Proven Quality: We strive for zero defects and deliver high-quality, safe, reliable and durable products that our customers' can rely on.

Dedicated Support: We offer dedicated support and 360° solutions, including connecting solutions, assembly solutions and global services.

Experience & Expertise: We are proven experts in connecting technologies with over 80 years of experience, global engineering teams and 13 manufacturing facilities.

Sustainability: We are committed to protecting the environment and practicing social responsibility in everything we do.

The Leader in Connecting Technologies and Assembly Solutions.

Oetiker is a leader in technological advancements in both connecting and assembly solutions. With over 80 years of experience, we develop innovative products like StepLess® ear clamps, SMILe® compact quick connectors and the newest EPC 01 electro-pneumatic controller to improve efficiency, productivity and quality for customers around the world.

EPC 01 Electro-Pneumatic Controller

Precision, Quality and Advanced Flexibility for Industry 4.0

The Oetiker EPC 01 is a new and innovative electro-pneumatic controller for accurate and reliable closure of Oetiker clamps. It is designed to support customers with their changing production environment and help them transition to Industry 4.0.

Key benefits of the EPC 01:

- Accurate and precise closures
- Verified and traceable connections
- Higher process and quality standards
- Flexibility for customer-specific adaptations
- Easy and safe automation integration
- Easy handling for installers
- Stable process with low maintenance

In addition to electronically controlled tool systems, Oetiker is a leading developer and manufacturer of high-quality hand assembly and disassembly tools.

Connecting Technologies

Oetiker connecting technologies are constantly evolving to meet the changing needs of our customers'. We offer a wide range of clamps, straps, rings and quick connectors for a variety of mobility and industrial applications.

Clamps

- Ear Clamps
- Low Profile Clamps
- Worm Drive & Universal Clamps
- Strap Clamps
- V-Clamps
- Color Coded ID Clamps

Rings

- Multi Crimp Rings Cross Welded
- Multi Crimp Rings Spirally Welded
- Multi Crimp Rings Puzzle Lock

Straps

- Tank Straps
- Powertrain Straps

Quick Connectors

- Aluminum
- Steel
- Polymeric
- Valved
- Membrane Seal

Oetiker Innovations.
Engineered for Peace of Mind.

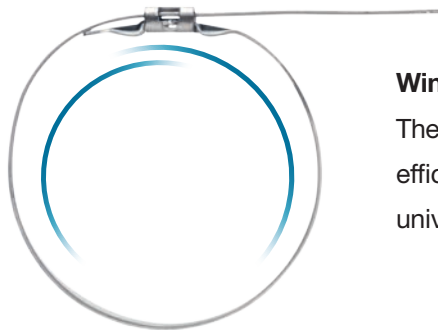

CrossTech®
The innovative CrossTech® feature is highly space-efficient and provides an ultra-low profile design for very low imbalance on rotating parts.

ToothLock®
Interlocked with its teeth, the distinctive ToothLock® feature offers extremely high and permanent compression rates and outstanding expansion resistance — strong enough for the toughest connections.

StepLess®
The special design eliminates steps and/or overlaps on the inner circumference of the clamp for a 360° leak-free seal.

WingGuard®
The innovative WingGuard® feature is highly space-efficient and offers a wide diameter coverage for universal usage.

PEXGrip®
The PEXGrip® preset feature allows the clamp to grip PEX tubing and prevents sliding for easy installation.

ForceTree®
The ForceTree® puzzle lock is a mechanical feature, designed for reliability and precisely employing mating band elements. It ensures a secure connection of the band ends with the specified radial load range.

DualHook
The DualHook Adjustable Ear Clamps feature an innovative design for use where high performance and universal features are demanded.

360° Approach to Deliver Value at Every Stage.

Oetiker's 360° approach to connecting solutions integrates connecting, assembly and global engineering services to deliver a seamless and value-focused customer experience at every stage, from initial concept to a 100% validated connecting solution.

Our global technical customer support team employs their extensive experience across a wide range of industries to understand our customers' specific needs. Application engineers then define the optimal connecting solution and thoroughly test it to meet even the toughest requirements.

Once a solution is defined and tested, our global power tools service team provides training and support from setup through to full-scale assembly. Maintenance and upgrade services are also available to keep processes running smoothly.

“We have to produce connections in a failure-free way. With the use of Oetiker clamps, we have this process under 100% control, and we can guarantee to our customers’ their connections will be leak-free.”

— *Daniel Gloeckner*
Veritas Ag

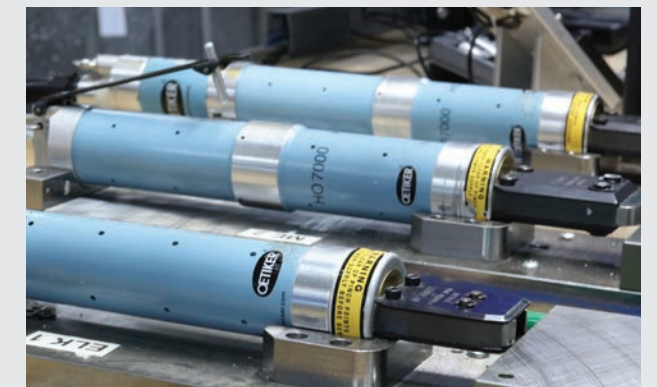

Global Services

Technical analysis and application engineers manage projects from consulting, testing/validation and commissioning, to training and maintenance.

Connecting Solutions

High-end clamps, rings, straps and quick connectors for a wide range of mobility and industrial applications.

Assembly Solutions

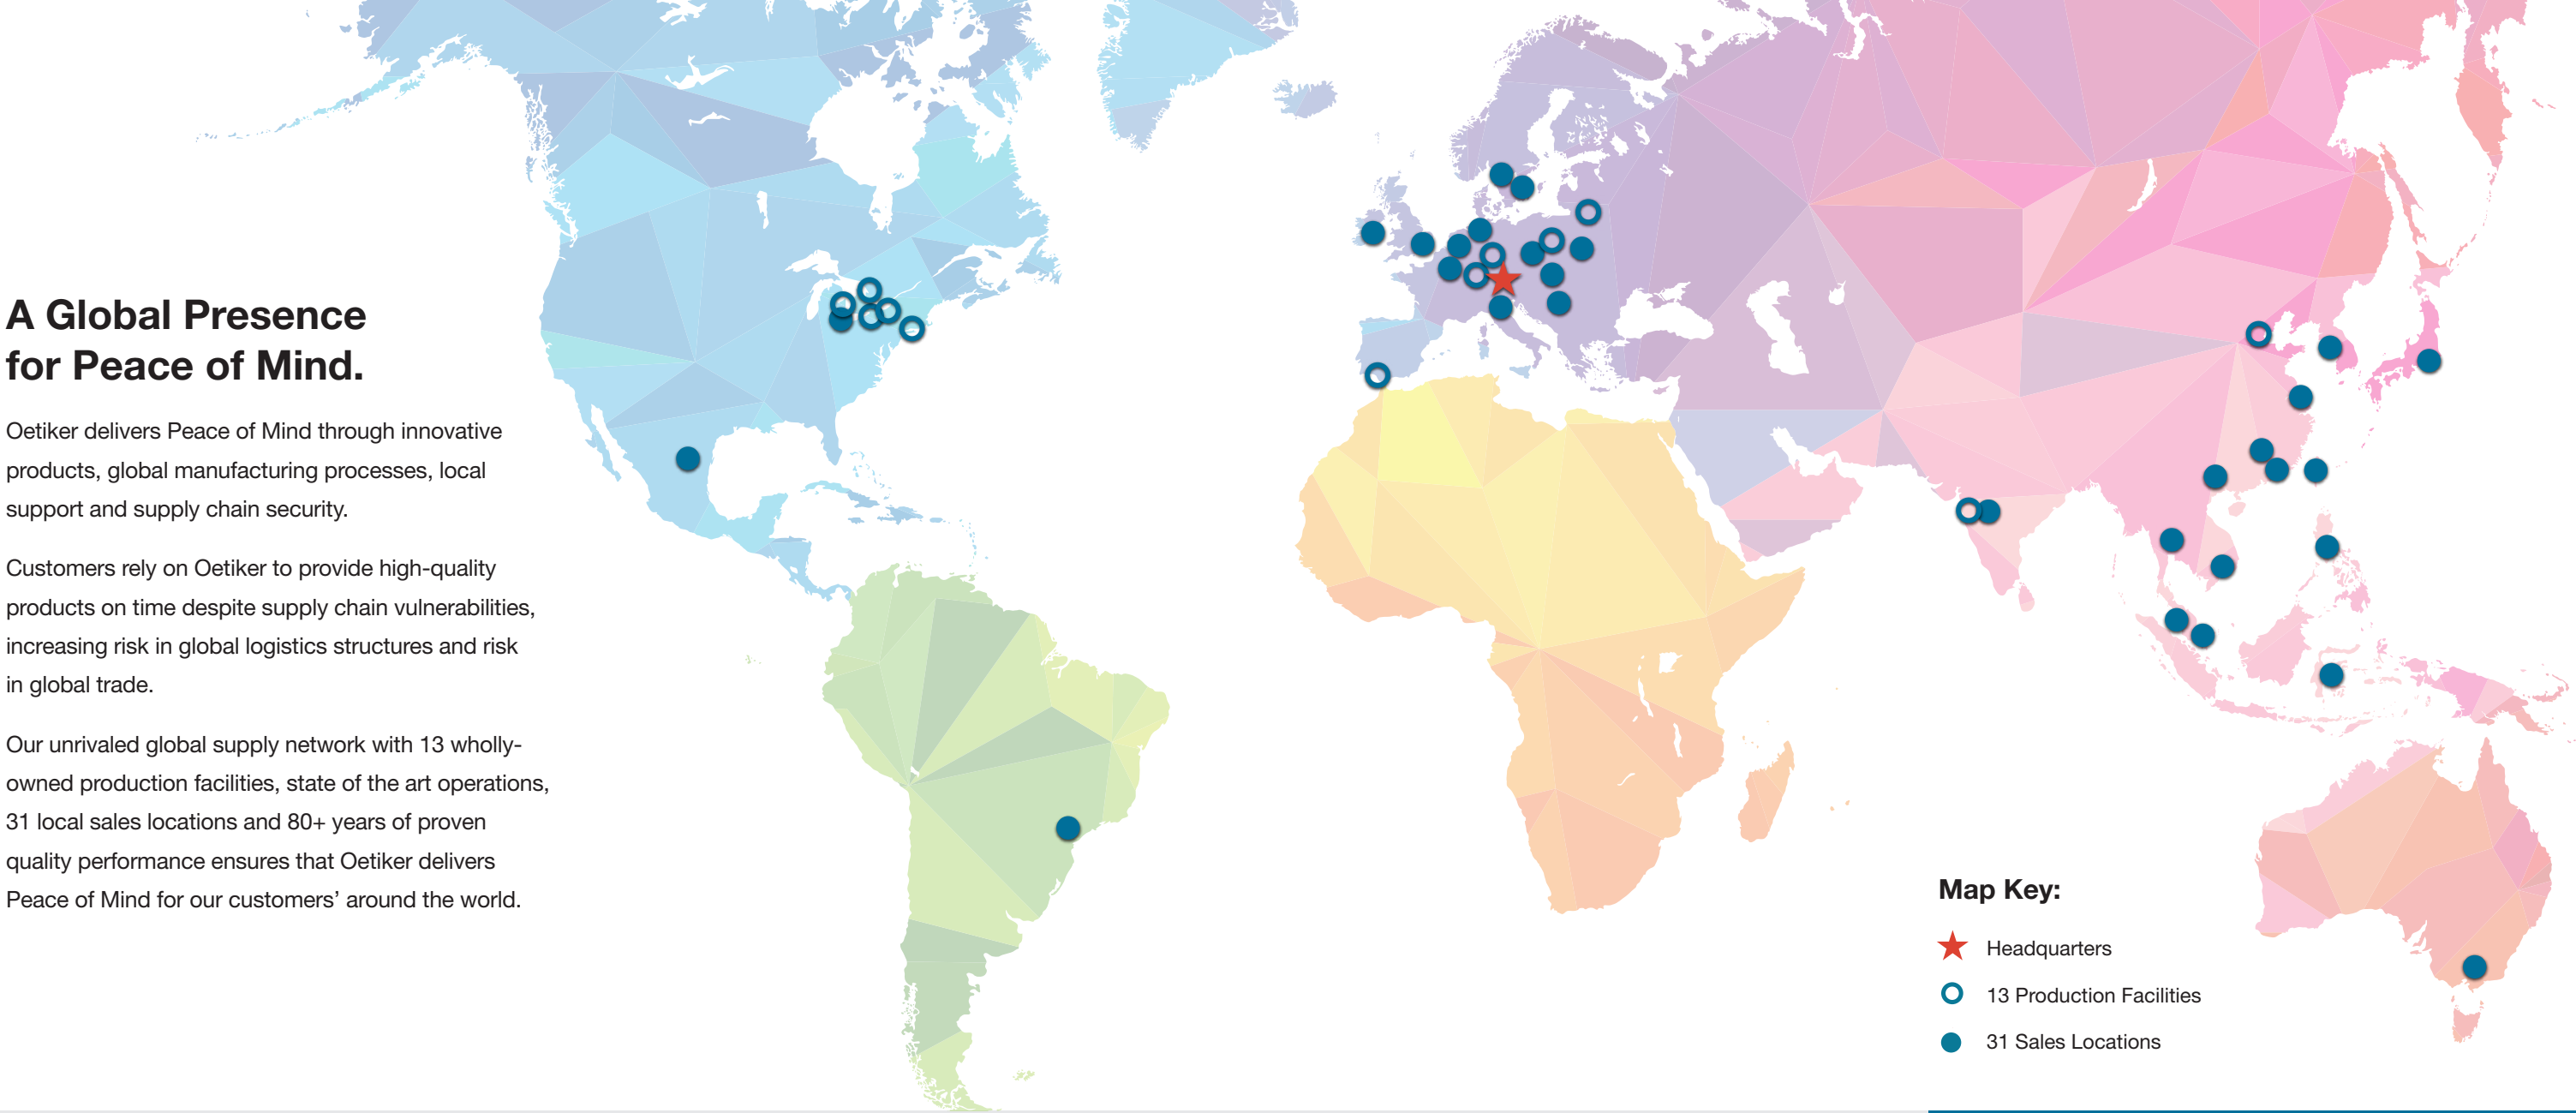

Design and work cell integration of mechatronic power tool systems, pneumatic pincers, swaging devices and testing equipment.

A Global Presence for Peace of Mind.

Oetiker delivers Peace of Mind through innovative products, global manufacturing processes, local support and supply chain security.

Customers rely on Oetiker to provide high-quality products on time despite supply chain vulnerabilities, increasing risk in global logistics structures and risk in global trade.

Our unrivaled global supply network with 13 wholly-owned production facilities, state of the art operations, 31 local sales locations and 80+ years of proven quality performance ensures that Oetiker delivers Peace of Mind for our customers’ around the world.

Leading Global Trends in Automotive Connecting Solutions.

The automotive industry’s transition to EV and alternative fuels is moving at a pace that requires consistent innovation from manufacturers to keep momentum. With our ongoing commitment to providing best-suited connecting technologies that align with current and future engineering needs, we continue to advance our unique product portfolio, addressing specific customer requirements for solutions that can handle high rotational forces, thermal stress, corrosion, intense shock, vibration and restricted radial space. Offering a comprehensive range of Clamps, Rings, Straps and Quick Connectors, Oetiker continues to provide conventional and EV components in virtually every vehicle manufactured globally.

Future Focused

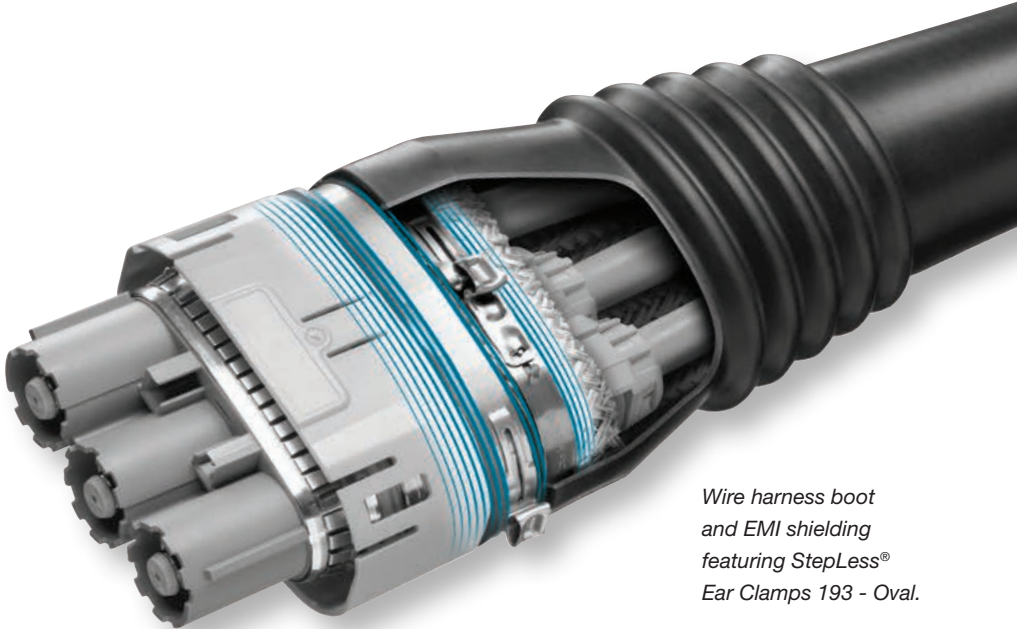

EV Connectivity, Charging and Thermal Management.

eMobility, the development of electric-powered drivetrains, batteries and charging systems, is changing the way the industry uses engineered solutions to meet new challenges for compact and lightweight systems. As a trusted leader in connecting solutions for the automotive industry, Oetiker's experience and innovations are continuously evolving to meet changing requirements for reliable, cost-effective and high-quality connections and assembly solutions. With our 360° Solutions Approach, our customers' are supported through all phases of development, including engineering, prototyping and testing to create powerful, lightweight and space-efficient solutions that meet our rigorous sustainability standards.

SMILe®

The World's
Most Compact
Polymer Quick
Connectors for
EV Thermal
Management.

A modular, versatile and easy-to-install thermal management QC system.

Oetiker's quick connector system significantly increases battery compartment space, reducing the overall footprint of the battery cooling system, therefore giving OEMs the ability to pack a larger volume of battery cells.

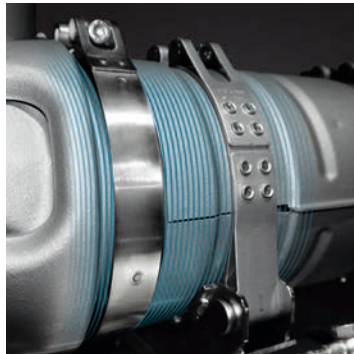

SMILe® (Surface Mount + In-Line QC = eMobility)

Proven Performance

Oetiker V-Clamps are the ultimate solution to fasten and seal circular flanges in high temperature and pressurized systems.

Oetiker's high performance products excel in maintaining mechanical integrity and sealing under vibration, stress and temperature in Exhaust Aftertreatment Systems and Engine Exhaust connections.

Proven Performance and Road-Tested Solutions.

Industrial vehicles endure tough road and working conditions on a daily basis. Exposure like shock, rotational forces, thermal stress, corrosion and vibration result in connecting challenges which require proven experience to overcome. Additionally, the move to alternative fuels or electrification is influencing overall design and performance requirements. Oetiker brings its unique expertise, insight and understanding as a global market leader of connecting technologies to tackle today's and tomorrow's Commercial & Industrial Vehicle connection challenges. Designed and tested for harsh environments and customized to application requirements, Oetiker offers a portfolio for every commercial or industrial vehicle — from trucks and buses to construction vehicles and tractors.

OEM Experts

Where Aftermarket Meets OEM Quality.

As cars are increasingly on the road longer, the Aftermarket industry must continuously meet evolving OEM standards for warranty work and repairs. Oetiker supplies OEM specified clamps, rings and quick connectors for Aftermarket applications within passenger vehicles. With billions of connections in service, Oetiker Aftermarket solutions meet OEM specifications from over 20 different vehicle manufacturers.

- Engine Applications
- Oil Coolers & Radiators
- Transmissions
- Turbochargers
- CV Joints

When CVJ repair and replacement is required, Oetiker Adjustable Clamps and hand installation pincers provide fast and simple installation for a wide range of OEM Drivetrain applications.

CVJ application featuring Oetiker DualHook Adjustable Ear Clamps 259.

Medical Connections

Oetiker offers a wide product portfolio and custom solutions to ensure the optimal connection for Medical and Biopharmaceutical manufacturing industries.

Oetiker connections play a critical role in dialysis machines and a range of advanced medical devices.

Lifesaving Medical Connections from Oetiker.

Modern medicine is rapidly advancing, offering groundbreaking treatments and revolutionary pharmaceuticals. Though medical applications are becoming more advanced, sterile tools and properly functioning medical devices remain integral to lifesaving procedures. Oetiker provides medical device and pharmaceutical customers with Peace of Mind that their mission-critical medical connections are clean, safe-to-touch and offer easy to operate installation tools. With proven solutions in ventilators, dialysis equipment and clean-room applications, Oetiker connections and assembly tools offer system integrity, ensuring consistent performance from manufacturer to patient and comply with legal regulations and life science best practices.

PEX Plumbing

Strong Connections Trusted by Plumbing Professionals.

Homeowners and builders enjoy the benefits and reliability of PEX/PE-RT Plumbing Systems, as well as the reduced cost and environmental impact compared to copper. Foreseeing this trend over a decade ago, Oetiker developed PEXGrip® preset clamps, a fast, simple and secure connection for PEX/PE-RT Plumbing Systems that meet the ASTM industry standard and are NSF approved. Paired with genuine Oetiker hand installation tools for onsite work or electronically controlled stationary tools for mass production, PEXGrip® preset clamps are an easy-to-install and a reliable connecting solution designed specifically for PEX/PE-RT Plumbing Systems. Oetiker products are used in potable water distribution systems and hydronic heating applications throughout the Americas and are also ideal for a wide range of plumbing applications within Recreational Vehicles.

- Residential Hot/Cold Water Supply Systems
- RV Plumbing Applications

PEXGrip® clamps and assembly tools are ideal for plumbing application installation within the Recreational Vehicle and Manufactured Home industries.

Irrigation Systems

Oetiker irrigation clamps are slim, lightweight, strong and are quick and easy to install with a range of hand installation tools, engineered specifically for Oetiker clamps.

Standard irrigation polyethylene pipe and fittings are securely connected with Oetiker 1-Ear Clamps with Mechanical Interlock 155.

Setting the Standard in Irrigation Systems.

With changing dynamics in water supply and demand, reliable connections to deliver safe, potable water are critical. Where crop irrigation is concerned optimal, leak-free performance is the standard, assuring proper performance and reduced water loss. Oetiker hose and tubing connections and installation tools have become a necessity in the Irrigation industry. As a trusted, long-term partner for irrigation companies worldwide, our expertise in high-quality clamps, rings and assembly tools support customers in a range of irrigation systems including polyethylene pipe applications.

- Agricultural Irrigation Systems
- Commercial Irrigation Systems
- Residential Irrigation Systems

Home Appliances

Strong Connections that Touch Everyday Lives.

People around the world enjoy everyday conveniences equipped with Oetiker's high-quality, leak-free connections. As technology and manufacturing needs for home appliances change, connecting and assembly solutions must evolve to meet smaller form factors and integration requirements. With compact connections and easy, high-speed assembly solutions for clothing washers, clothing dryers, dishwashers and more, Oetiker will continue to be a proven partner to the Home Appliance and White Goods manufacturers, making the home appliances of tomorrow.

- Coffee Machines
- Dishwashers
- Steam Cleaning Equipment
- Steam Ironing Equipment

Oetiker works with White Goods OEMs to develop strong, reliable connections that stand up to high pressure and temperatures required in today's home appliance performance.

Food & Beverage

*Beverage dispensing system featuring
StepLess® Ear Clamps 167.*

Common beverage dispensing systems rely on leak-free Oetiker connections for maximum performance and cleanliness in bars and restaurants around the world.

Clean, Reliable and Strong Connections.

Beverage dispensing in beer, soda and other products is a massive global business, representing billions of dollars in delivered product to thirsty customers. For decades, Oetiker clamps have been a mainstay for beverage dispensing machine OEMs and service providers, installing millions of clean, leak-free connections every year. With expertise solving unique connection issues for Food & Beverage applications, Oetiker is a proven, global, long-term partner in the industry.
