

Quick Connect Disconnect

Dry-Break (Non-Spill) Design

Recommended for use in critical applications that require dry break technology.

Minimize Downtime and Simplify Maintenance.

Our Quick Connector enables fast, tool-free connections and disconnections, minimizing downtime and simplifying maintenance. Whether you need to quickly connect or disconnect cooling lines for maintenance, upgrades, or troubleshooting, Oetiker Quick Connectors provides a reliable and efficient solution.

QCDC Features & Benefits:

Dry-Break (Non-Spill):

modular combination with polymer fluid lines

Fluid Compatibility:

glycol, refrigerants, oils, di-electric fluids, etc.

Adaptable Design:

customizable user interface (threaded, hose barb, push lock, etc.)

Poke-Yoke Design:

avoid misoperation

Sizes*:

1/8", 1/4", 3/8", 1/2"

Materials*:

aluminum, stainless steel

Interfaces*:

AN, NPT, ORB, Reusable Nut, Push-to-Lock, and Hose Barb

*sizes, materials, and customer interface available on request, lead time may vary from standard configuration
