Near Term Market Outlook Considerations Week Beginning January 15, 2018

This Week's Select Summary Considerations:

- 10-Year US Treasury Yield:
 - Consolidating with new highs possible to 2.75
 - Higher yields have been in part a function of U.S. and Global market intervention activities designed to extend domestic and global growth and the business cycles
 - Lower yields are a function of: Demand, Economic Weakness, Event Risk Concerns, or Other Market Concerns/Factors could take the yield lower
- U.S. Dollar Index:
 - A significant decline is now underway, so first give consideration to 87 before correcting and moving lower
 - Given global macro considerations coupled with no significant global anomaly event moving forward this index may have some serious weakness
 - Unless Middle East, North Korean, European, Venezuelan or other anomaly events start to dominate market participant decisions, then we are still in search of a major low for the dollar
- CRB Index:
 - Macro factors and chart structure imply continued cautious optimism, though some back filling may be in order
 - Global Government and Central Bank actual and anticipated intervention indicate a slow fruit bearing process underway
 - Bigger Picture: Though dangerously spastic, global macro and growth forces in general remain supportive of the commodity sector

Near Term Market Outlook Considerations Week Beginning January 15, 2018

Near Term Summary Considerations:

- \$WTIC Light Crude Oil:
 - Fundamentals and global uncertainties increasingly supportive of this market
 - Price action to \$73-plus a consideration
 - A complex and volatile market focused on global uncertainties like Saudi Arabian and Iranian building friction, other Middle East challenges, North Korea, market structure, geopolitical considerations and building possibilities of a Venezuelan civil war are just some additional considerations, all deserve heightened respect in a world with building economic, social, political and homeland security uncertainties
- Soybeans:
 - A complex market that needs to build on Friday's price strength, or consideration must be given to revisiting the 2017 low of \$9.00
 - A world awash in liquidity, building economic momentum and many hard assets seemingly overvalued, be careful not to overlook the possible attractiveness of this asset to speculators, investors and end-users
 - Simply stated watch the price action to define soybean price dynamics
- Corn:
 - Searching for a low, so assume bearish until price action becomes more supportive of a bullish case and give consideration to prices possibly moving to their previous 2016 lows of \$3.15 or below

Near Term Market Outlook Considerations Week Beginning January 15, 2018

Near Term Summary Considerations:

- Long Grain Rice:
 - This market likely has more weakness than strength as market participants digest potential of significant expansion of 2018 U.S. long grain rice planted acres
 - Remain aware of potential near term uncertain global economic crosscurrents related to currencies, bonds, equities and commodities as they go through a rebalancing process
- Cotton:
 - Cotton prices are in a slow grind to the upside. Closing and holding above 88.50-cents implies possible significantly higher prices
- Wheat:
 - Wheat appears to have additional price weakness into the 3.90 area
- SPY SPDR S&P 500 ETF:
 - Trend remains up, but a cautionary time period
 - Consolidation or correction desirable not required
 - Allow price action to provide guidance

Near Term Market Outlook Considerations Week Beginning January 15, 2018

Near Term Summary Considerations:

- \$COMPQ Nasdaq Composite:
 - Passive investors have lifted this market to a level that one must now focus on the risk vs reward of holding the index near term
 - Allow price action to provide guidance
- EFA iShares ETF - Global Equities Excluding U.S. and Canada:
 - Trend remains up
 - Momentum regained
 - Allow price action to provide guidance
- EEM iShares ETF, Emerging Market Equities:
 - A cautionary time, but momentum regained
 - Allow price action to provide guidance

\$UST10Y – 10 Year US Treasury Yield Weekly, Daily and Monthly Charts

This Week

Primary Consideration:

- Consolidating with new highs possible to 2.75
- Higher yields have been in part a function of U.S. and Global market intervention activities designed to extend domestic and global growth and the business cycles
- Lower yields are a function of: Demand, Economic Weakness, Event Risk Concerns, or Other Market Concerns/Factors could take the yield lower
- If the yield moved above 3.00 then consideration would need to be given to a change in trend
- Bond yields need to hold at 1.95 or serious consideration would need be given to ominous building economic problems
- **Big Picture: This is a market that likely moves sideways for a few years and even revisits the previous low or lower**

US Dollar Index

Weekly, Daily and Monthly Charts

This Week

Primary Considerations:

- A significant decline is now underway, so first give consideration to 87 before correcting and moving lower
- Given global macro considerations coupled with no significant global anomaly event moving forward this index may have some serious weakness
- Unless Middle East, North Korean, European, Venezuelan or other anomaly events start to dominate market participant decisions, then we are still in search of a major low for the dollar
- Big Picture: The dollar has a bullish bias given global economic, social, political and military challenges, but present policy actions and macro factors favor more dollar weakness than strength. Longer Term there is no question the dollar is bullish, but that scenario continues to be pushed forward into the future

CRB Commodity Index

Weekly, Daily and Monthly Charts

This Week

Primary consideration:

- Macro factors and chart structure imply continued cautious optimism, though some back filling may be in order
- Global Government and Central Bank actual and anticipated intervention indicate a slow fruit bearing process underway
- **Bigger Picture:** Though dangerously spastic, global macro and growth forces in general remain supportive of the commodity sector
- For the CRB Commodity Index to have a strong breakout will likely be a function of oil price leadership and/or broad commodity support, a reasonably stable to weaker dollar and belief and confidence in global fiscal, monetary, trade and regulatory policy leadership

\$WTIC Light Crude Oil Weekly, Daily and Monthly Charts

This Week

Primary Consideration:

- Fundamentals and global uncertainties increasingly supportive of this market
- Price action to \$73-plus a consideration
- A complex and volatile market focused on global uncertainties like Saudi Arabian and Iranian building friction, other Middle East challenges, North Korea, market structure, geopolitical considerations and building possibilities of a Venezuelan civil war are just some additional considerations, all deserve heightened respect in a world with building economic, social, political and homeland security uncertainties
- Expanding global demand, Saudi Arabia, Russia, OPEC, other oil producers, and other factors have a major role in limiting 2017 price downside
- As always, remain focused on the bigger “Geopolitical Picture and Building Homeland Security Friction”

Soybeans

Weekly, Daily and Monthly Charts

This Week

Primary Consideration:

- A complex market that needs to build on Friday's price strength, or consideration must be given to revisiting the 2017 low of \$9.00
- A world awash in liquidity, building economic momentum and many hard assets seemingly overvalued, be careful not to overlook the possible attractiveness of this asset to speculators, investors and end-users
- **Simply stated watch the price action to define soybean price dynamics**

Rice

Quarterly and Daily Charts

Near Term

Primary consideration:

- This market likely has more weakness than strength as market participants digest potential of significant expansion of 2018 U.S. long grain rice planted acres
- Remain aware of potential near term uncertain global economic crosscurrents related to currencies, bonds, equities and commodities as they go through a rebalancing process
