HOMES FROM AROUND THE WORLD

Here at Graham & Brown our customers are at the heart of our business – We would be nothing without you! We are always inspired by the way you use our paper and paint in every corner of the world. From our home here in the UK all the way to France, Holland and the USA, you all have your own unique ways of styling our products in your homes.

Every country has its own interior design styles and trends in the same way they have their own unique cultures and traditions. In France, trends are usually rejected for a more effortless chic look whereas in Holland, cosy Scandi design is popular. In the UK, houses are usually a lot smaller so lighter colours and space saving techniques are key, whereas in

the US they have quite the opposite problem. Extra rooms and space mean laundry rooms and closets are staples in the average US home. With such different approaches each country offers fresh inspiration for our homes.

To showcase all the ways you have used our products across the globe we are putting the spotlight on some of our favourite influencers whose homes give us serious interior-envy! From wallpaper on ceilings to patterns painted on cabinets, there is no shortage of inspiration from these folks.

London TOWNHOUSE

Our UK look is inspired by Stacey Dyer's cosy Edwardian terraced home. It's no secret that homes lean to the smaller side here in the UK so it's important to make the most of the space available. Stacey does this perfectly by layering an ornate gold frame on our Prism Navy wallpaper, resulting in an impactful statement wall without being overpowering. Paired with the shades Notte and Glass Heart on the walls, the space is the snuggest of sanctuaries.

Sophia of @thiscolourfulnest's candy-coloured office makeover will satisfy your sweet tooth without giving you cavities!

We're thrilled to see a huge rise in pastel and candy coloured décor throughout the pandemic, whether that's because this colour scheme is playful and expressive or simply because pastels work all year round, they're perfect for cool interiors in the summer, mellow interiors in the wet and windy months, and the cheerful shades help beat the winter blues.

Colour will dramatically change the look of an interior and is known to impact your mood. While all-white spaces can be just as chic, there's something special about relying upon an energetic colour scheme to express your design aesthetic and this candy-coloured office makeover has satisfied our sweet tooth!
