INVESTMENT DESCRIPTION

Double Alpha makes use of Customised Solutions' expertise and experience in the derivatives market as well as the expertise and experience of Futuregrowth in the fixed income arena. The Portfolio provides investors with unique sources of alpha through the combination of optimal derivative usage and the appropriate amount of credit and duration risk to meet its performance objective. The Portfolio aims to outperform the FTSE/JSE SWIX 40 over rolling 3 year periods.

INVESTMENT STRATEGY

The Portfolio is constructed through the purchasing and appropriately timed rolling of long futures contracts whilst at the same time managing a pool of cash in credit and duration instruments according to a well-defined mandate. As one of the most experienced and skilful users of derivatives in the SA market, we are perfectly positioned to capture the best pricing in this market. The Futuregrowth interest rate process is designed to take advantage of both key value-adding areas of fixed interest fund management, namely market timing and asset selection.

SUITABLE INVESTORS

- Retirement funds, corporates, asset aggregators, medical aids
- With a time horizon: 3 - 5 years
- And a moderate risk profile in an equity context
